

project Development Phase Model Performance Test

Date	21 October 2023
Team ID	NM2023TMID03960
Project Name Project -	Project – Central Bank Management
Maximum Marks	10 Marks

Model Performance Testing:

Project team shall fill the following information when working for blockchain.

Sno	Parameter	Values	Screenshots
1	Information gathering	Setup all the Prerequisite:	 <p>The screenshot shows a Windows desktop environment. In the background, there is a Microsoft Start page with a news article titled 'World Cup 2023: Rashid ahead of Afghanistan's group stage' and a video player showing a man eating. In the foreground, a web browser window is open, displaying a crypto portfolio for '0.3908 MATIC' with a value of '\$0.22 USD'. The portfolio includes a list of tokens and their prices, such as 'SOL/ETH', 'ZOMATO', 'NFTY', 'SENEX', 'LTC/ETH', and 'Cricket World Cup'. The browser also shows a 'Watchlist suggestions' section and a 'Cricket World Cup' section with a match between India and Australia.</p>

			 
2	Extract the zip files	Open to vs code	

3	Remix Ide platform exploring	<p>Deploy the smart contract code</p> <p>Deploy and run the transaction. By selecting the environment – inject the Meta Mask.</p>	
4	Open file explorer	<p>Open the extracted file and click on the folder.</p> <p>Open src, and search for utilities.</p> <p>Open cmd enter commands</p> <ol style="list-style-type: none"> 1.npm install 2.npm install bootstrap 3.npm start 	 

			 <pre> Windows PowerShell deprecation: Please use the 'setupMiddlewares' option. (Use 'node --trace-deprecation ...' to show where the warning was created) (node:16772) [DEP_WEBPACK_DEV_SERVER_ON_BEFORE_SETUP_MIDDLEWARE] DeprecationWarning: 'onBeforeSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option. Starting the development server... One of your dependencies, babel-preset-react-app, is importing the "@babel/plugin-proposal-private-property-in-object" package without declaring it in its dependencies. This is currently working because "@babel/plugin-proposal-private-property-in-object" is already in your node_modules folder for unrelated reasons, but it may break at any time. babel-preset-react-app is part of the create-react-app project, which is not maintained anymore. It is thus unlikely that this bug will ever be fixed. Add "@babel/plugin-proposal-private-property-in-object" to your dependencies to work around this error. This will make this message go away. [compiled successfully] You can now view hank in the browser. Local: http://localhost:3000 On Your Network: http://192.168.91.176:3000 Note that the development build is not optimized. To create a production build, use npm run build. webpack compiled successfully </pre>
5	LOCALHOST IP ADDRESS http://localhost:3000	Copy the address and open it to chrome so you can see the front end of your project.	<p>Local: http://localhost:3000</p>
